

## How Simply Fragrance Works

*The fuel cell creates hydrogen within the fragrance chamber. As each molecule of hydrogen is created, it forces (pushes) an equal volume of fragrance out of the chamber. Natural air flow in the restroom distributes the fragrance throughout the room.*

## When Activating Refill, Push Down & Twist

Remove Strap

Push Down

Twist

Position the dispenser in an area where moving air will disperse the fragrance and neutralizer throughout the entire area, i.e., 3-6 ft. within the entry way. One dispenser for each 6,000 cubic feet.

## Simply Fragrance Performance

## Typical Gel Performance
