FACILIPRO™

Eliminate malodor
at the source

CREATING A POSITIVE FIRST IMPRESSION

The perception of **cleanliness in a facility** is influenced by odor and reflects the **level of safety and quality** of the environment. Ecolab's **Bio-Enzymatic Odor Eliminator** helps create comfortable spaces and helps simplify the cleaning process for your staff. This all-in-one product instantly knocks-down odor upon application and has continuous action to eliminate odor at the source. It has a simple application process and is effective on the following surfaces:

Hard Surfaces

Floors

Soft Surfaces

Carpet

2/3

people agree they can quickly determine the cleanliness of a facility based on the smell of the interior.¹

89%

of people would never consider a senior living community if it had a bad odor.²

3-Part Action

- Immediate odor knock-down
- Odor pairing technology designed to counteract urine and body odors
- Continuous bio-enzymatic action after initial application

Simple and Easy-to-Use

1. Remove and clean visible soil and disinfect area as needed
2. Apply product directly to the source of odor
3. **For hard surfaces:** Generously apply product to problem areas and let air dry
For soft surfaces: Saturate soiled area, blot excess product and let air dry
